

# VULVAR CANCER SYMPTOMS

**Below are some of the key symptoms to look out for that might indicate vulvar cancer. It's critical that women consult a doctor if they experience these symptoms for a period of more than three weeks.**

**A lump somewhere on the vulvar, commonly on the inner edges of the labia majora or labia minora**

**Growths on the vulva that look like warts or ulcers**

**Vulvar itching**

**Vaginal bleeding that is not menstruation**

**Tenderness of the vulvar area**

**Colour changes in the skin of the vulva**
